

## Hydroponic Feeding Schedule (10-week Bloom)

### USEFUL CONVERSIONS

1 teaspoon	=	5 ml
1 tablespoon	=	15 ml
1 ounce	=	30 ml
1 quart	=	946 ml
1 gallon	=	3.785 L
1 gallon	=	128 ounces

\*1 teaspoon (powder) = 2 1/3 grams (approx.)

*Always use un-chlorinated water, maintain pH levels between 5.5-6.5 and check reservoir after adding all nutrients. Oxygenate water before and during application. To prevent nutrient settling, always use a pump at the bottom of the reservoir to continually agitate and mix the nutrient water during application. Research and Development conducted using water obtained by reverse osmosis containing near 0 PPM.*

*Humboldt Nutrients complete hydroponic feeding schedules work great with re-circulating, drain to waste, and all other growing methods. If using a ebb & flow system, every 5-7 days drain your reservoir then clean your pump and equipment.*
